Annuity interest rates effective May 15, 2018

New business guidelines

Fixed Index Annuity Products

Applications must be received prior to the effective date to hold previous rates. For rates on 1035 exchanges/transfers, the Applicant will receive the greater interest rate in effect at the Application received date or receipt of premium at the Home Office, if received within 45 days of the application received date. If the 45th day is on a weekend or holiday, the funds need to be received by the previous business day in order to hold current interest rates, Index Cap Rates, Participation Rates, Index Margins, and Declared Performance Rates. Funds received after 45 days will receive the Applicable rates that are in effect at the time of receipt. No exceptions will be allowed for rate holds. Interest rates are subject to change without notice.

DISCLOSURES

PREMIUM BONUS: Premium bonus may vary by annuity product and surrender charge period selected. Products that have premium bonuses may offer lower credited interest rates, lower Index Cap Rates, lower Participation Rates and/or greater Index Margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus may be offset by the lower credited interest rates, lower Index Cap Rates, lower Participation Rates and/or greater Index Margins.

SURRENDER CHARGE: A surrender during the surrender charge period could result in a loss of premium. Surrender charge structure may vary by state.

*GLWB: GLWB Bonus and GLWB Stacking Roll-Up Credit are not applied to the Accumulation Value, only to the GLWB Value, which is used to determine the lifetime payment amount. The GLWB value is not available for withdrawal, surrender or as a death benefit. There is no GLWB Stacking Roll-Up Credit in years when a withdrawal is taken or lifetime income payments have been elected. GLWB Stacking Roll-Up Credit is available if a Required Minimum Distribution (RMD) is required.

INDEX ACCOUNTS:

Crediting methods such as Index Cap Rates, Participation Rates, and Index Margins apply to index accounts only; not to the Fixed Account. Crediting methods and indexes are not available on all products or in all states.

For the Hindsight Index Strategy®, the weighting index percentages are 50% for best performing, 30% for next best performing and 20% for lowest performing and are subject to change for newly issued contracts. The Hindsight Index Strategy® consists of the S&P 500®, EURO STOXX 50® and the Russell 2000®.

This index is managed to a volatility target, and as a result the index performance will not match the performance of any other index or the markets in general since volatility control tends to reduce both the rate of negative performance and positive performance of the underlying index, thereby creating more stabilized performance. The S&P 500® Low Volatility Daily Risk Control 5% Index and S&P 500® Low Volatility Daily Risk Control 8% Index have been in existence since 8/18/2011. Ending values in years prior to inception are determined by S&P Dow Jones Indices LLC or its affiliates ("SPDJ") using the same methodology as used currently.

The Gold Price Index Option credits interest based on the change in the price of gold per troy ounce in US Dollars as established by the London Bullion Market Association (LBMA) Afternoon (PM) Gold Price and administered by the ICE Benchmark Administration (IBA).
